

# Assignment 2: Planning

Semaa Amin  
10056795

## a. Description Section (Use Lesson 4 slides for help)

### i. "What do you want to make?"

A simple to-do list.

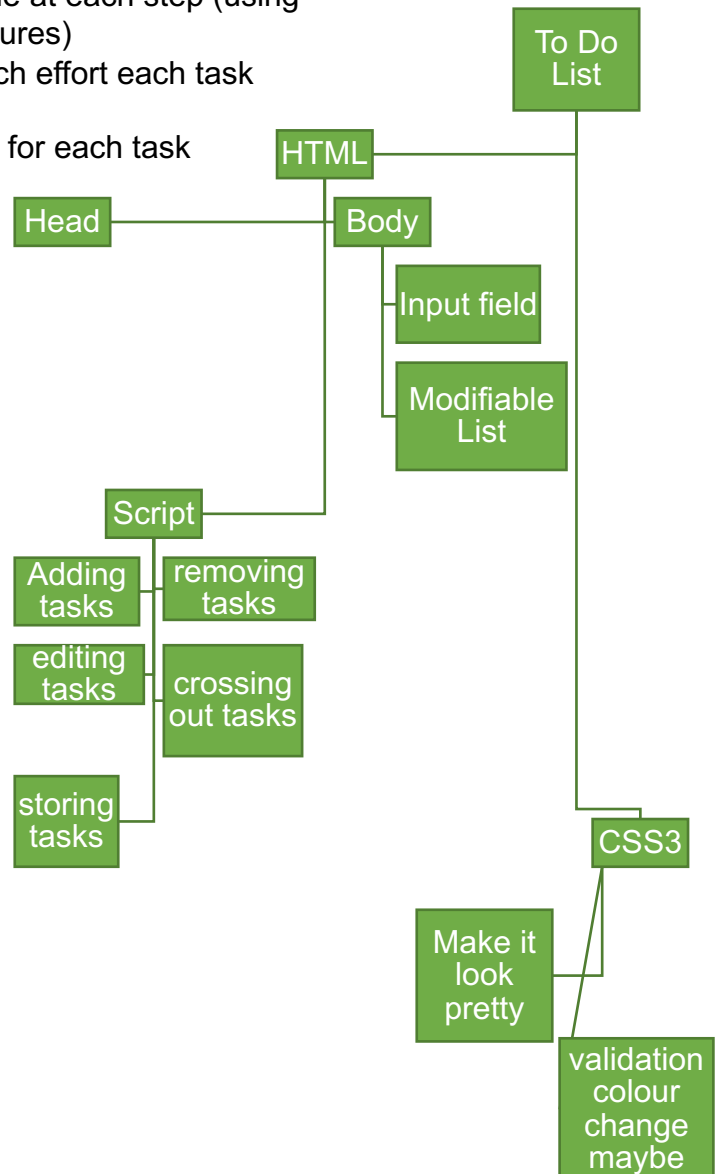

1. Steps required to accomplish the project objectives

1. Download and attach JQuery UI
2. Create HTML Document with script
3. Create CSS3 Document

1. Tasks needed to be done at each step (using Work Breakdown Structures)
2. An estimate of how much effort each task requires
3. The resources required for each task

The work breakdown structure on the right is mapped out to show how much effort the tasks require and where they will be placed/found

Resources will be using lecture notes 3,4 &5

ii. "What technology will you use?"

1. Languages (e.g. HTML, CSS, JavaScript)

- HTML
- CSS3
- JS

2. Libraries (e.g. jQuery, Bootstrap)

- JQuery
- Bootstrap maybe?

3. Environments (e.g. cross browsers)

- Cross Browsers

b. Feature Section. This section should answer questions of "What features will application include?".

- Create Notes
  - Need to Create notes that append to the list.
  - Time permitting, see if I can add the drag and drop feature to make the order of the list modifiable
- Edit Notes
  - Create function that allows to change the input of added lists
- Delete Notes
  - Create function that removes ul from list. Must make sure can remove any one of them selected and not just the last one from the list
- Store Notes
  - Create a function to store the notes even if refreshed
- View Collection of Notes
  - Have it all displayed at a glance and not in accordion style or maybe have an accordion style that can be expanded

c. Prototype Section holds all the information about the project prototype.

You must provide a design and height level chart.

The prototype should show the feature and process flow and how these processes related to each other.
